Background

I am an accomplished, results-driven manufacturing management professional with extensive experience in developing strategies that improve operations and promote higher production quality, a strong technical education that includes a bachelor's degree in Business Information Systems, and outstanding leadership, communication, and decision-making skills.

As a top-performing team leader with almost 10 years of management experience in safety-critical production environments, I demonstrate a history of going above and beyond to ensure achievement of all corporate objectives and have built a reputation as the "go-to" for solving complex project and logistical issues. I also display strong operational expertise which shown through my proven track record of successfully analyzing key trend data and implementing new training and procedure enhancements that improve team and production performance. Also, with my outstanding leadership and interpersonal skills, it is easy for me to effectively manage diverse teams and build strong long-term relationships with key regulatory agencies, clients, and industry partners

EXPERIENCE

Company Name **Company Name**
Title **Independent Consultant**
Location Country, State, City
Time Period August 2017 to Present
Checkbox Currently work here

Description

I am currently managing a wide variety of projects for company clients while paving the way for new in-house operational improvements and expense reductions through the streamlining of management roles, oversight of warehouse moves to paperless environments, creation of key employee and business systems, implementation of efficiency-boosting applications, and the development of new reporting structures to maximize team performance, safety, and quality. My key accomplishments in this role include:

- Spearheading a scalable distribution process for a major client involving design of a new warehouse system, and a strong management and operational structure that will save the client over \$250 in costs.
- Implementing a 7-day operation schedule and innovative training improvements that eliminated the need for overtime, slashed weekly customer complaints from 200 to 5.

Company Name **Company Name**
Title **Operations Manager and Production Controller**
Location Country, State, City
Time Period 2011 to 2017
Checkbox ~~Currently work here~~

Description

I directed a team of 10 managers and 40 associates devoted to maximizing manufacturing productivity, safety, quality, and accountability. Handled a variety of essential operational activities including workload planning, database maintenance, strategic objective planning, production floor oversight, and execution of quality corrective actions. I also managed team hiring, training, and coaching while serving as primary point of contact for customers, managers, and engineers. My key accomplishments in this role include:

- Increasing overall responsiveness and efficiency while cutting quality costs through development and execution of a new team leader coaching and promotion initiative.
- Pioneering a comprehensive new employee training and development program that significantly improved team safety awareness, streamlined the cross-training process, and reduced onboarding and orientation time.
- Boosting efficiency while also cutting lead time by driving innovative scheduling changes.

Company Name **Company Name**
 Title **Shipping Department Supervisor and Area Manager**
 Location Country, State, City
 Time Period 2010 to 2011
 Checkbox ~~Currently work here~~

Description

Here I managed the Shipping and Formation departments as well as a team of supervisors and specialized technicians tasked with the maintenance and improvement of the production process, shipping and receiving activities, and material handling procedures. I also collaborated extensively with 20 direct reports and more than 140 indirect employees to drive production goal attainment, monitor daily shipping schedules, and maximize operational safety and efficiency. My key accomplishments in this role include:

- Spearheading a new system that streamlined the receiving process and boosted productivity 20%.
- Designing an innovative motorcycle battery pre-pick process that increased production efficiency, quality, and speed while also minimizing defects and process nonconformities.
- Implementing new safety practices that maximized production safety and secured an excellent safety record during the time spent managing the Shipping and Formation departments.

Company Name **Company Name**
 Title **Project Manager**
 Location Country, State, City
 Time Period 2006 to 2010
 Checkbox ~~Currently work here~~

Description

In this role I directed all aspects of daily production and department operations through attentive management and coaching of 4 supervisors and over 100 employees. I also handled a wide range of mission-critical operational tasks such as scheduling, workload planning, performance appraisals, conflict and problem resolution, and monitoring budgetary, functional, and quality considerations to ensure top product quality and conformity with client requirements. My key accomplishments in this role include:

- Implementing Lean manufacturing concepts to all processes and procedures which improved overall operational efficiency, safety, and quality.
